

Casting®

SOIL AMENDMENT

A non-pesticidal, plant nutrient based liquid that improves turf health and amends the local soil surface environment in areas facing the negative consequences from excessive surface casting.

Analysis Breakdown

Specific Gravity 1.15

Nutrient	% w/w
Total Nitrogen (N)	5.1
Ammoniacal Nitrogen	5.1
Sulphur Trioxide (SO ₃)	14.4
Sulphur (S)	5.8
Calcium Oxide (CaO)	0.05
Calcium (Ca)	0.035
Iron (Fe)	0.28

APPLICATION RATE PER HECTARE

1st application of the season

(Sept - March) 20L/ha in 250-400L of water.

Re-apply fortnightly until problem is alleviated

10L/ha in 250-400L of water.

**Sand based rootzones may require more frequent application: suggest 10 day intervals. Allow 2-3 days from application to begin to see the benefits of reduction in surface casts.*

KNAPSACK SPRAYER RATE

250-500ml per 10L of water.

PLEASE NOTE

Casting® is a cultural soil amendment and not a fertiliser. As such it should always be used as part of a standard nutrient program. Always read and follow label instructions.
